

Lime lemonade

Ingredients for about 3 ½ cups lime lemonade:

Water: ½ cup + 2 ½ cups (medium or sparkling mineral water)

Sugar: 4 oz.

Limes: 5 pieces (yield approx. 1 cup lime juice)

Ice cubes: 8 pieces

Step 1: Mix ½ cup of water and 4 oz. of sugar in a pot and bring to the boil.

Step 2: Halve the limes and squeeze them. If necessary, the collected juice can be passed through a sieve again. Add the lime juice with the ice cubes in the pot and stir until the ice has melted. Allow the lime to cool and then add 2 ½ cups of water.
